BENCH SEATS

LocSteel Rail Bench Seats

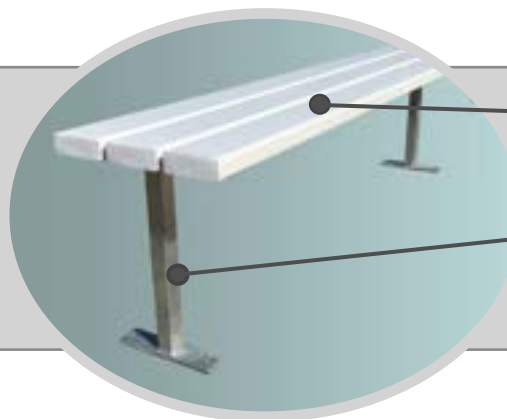

Steel Post & Rail **Locsteel** seating uses our unique and proven galvanised based BlueScope Australian Steel, roll formed 108x38mm seat planks with a Colorbond protective colour finish. The Locsteel section has excellent thermal properties, with it's 1.2mm wall thickness the metal will not retain high levels of heat. The minimal heat retention is optimised by the internal air void. Combined with our heavy duty, hot dip galvanised steel brackets, these bench seats are highly durable and maintenance free and have been proven to outperform competitor products.

Colorbond® Standard Colour Options

BENCH SEATS

LocSteel Architectural Bench Seating

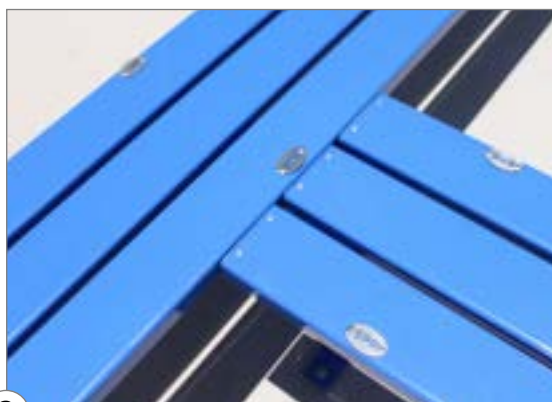

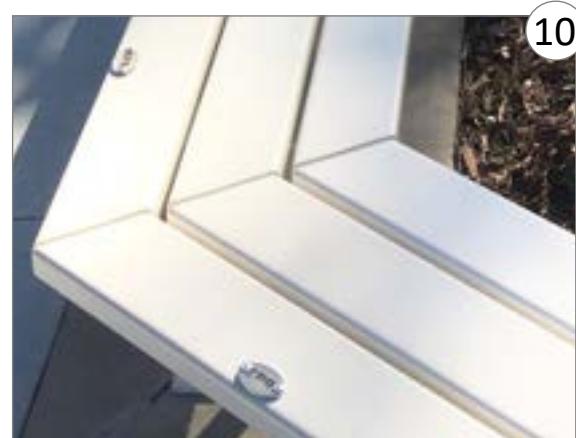

Steel Post & Rail customised bench seating uses our proven galvanised Locsteel seat rails & hot dip galvanised steel brackets, powder coated in any powder coat colour of choice. Our bench seating can surface mount, mount in-ground in a concrete footing, or wall mount using our own heavy duty hot dip galvanised mild steel brackets. Our custom seating is fabricated in-house to any shape and configuration our customers require.
